MANIFOLD HELIX — POLAR SLICE MAP

NUCLEAR_SEMF_COMPOSI | Nuclear SEMF Binding | 118 intervals | 5 carriers

Each numbered circle marks a polar slice. Coordinates: CLR1 (x), CLR2 (y), interval (z).

Intervals: 118 | Carriers: B_volume, B_surface, B_coulomb, B_asymmetry, B_pairing | Events detected: 0

GHOST STACK — ALL INTERVALS OVERLAID

NUCLEAR_SEMF_COMPOSI | Nuclear SEMF Binding | 118 slices composited

All 118 polar slices overlaid. Bold outlines: first (0, green) and last (117, red).

Density reveals where the manifold concentrates. Shape migration shows structural change over time.

Peter Higgins / Rogue Wave Audio / CC BY 4.0

DIFFERENCE POLAR — YEAR-OVER-YEAR CLR CHANGE

NUCLEAR_SEMF_COMPOSI | Nuclear SEMF Binding | 117 delta intervals

Year-over-year CLR differences (delta_CLR_j = CLR_j(t) - CLR_j(t-1)). Large polygons = rapid change. Small = stability.

Max delta: 0.16 | Mean delta: 0.08

Peter Higgins / Rogue Wave Audio / CC BY 4.0

AITCHISON NORM PROFILE

NUCLEAR_SEMF_COMPOSI | Nuclear SEMF Binding | 118 intervals

Min ||x|| = 6.95 | Max ||x|| = 10.24 | Mean = 8.40 | Range = 3.29

Bars = Aitchison norm per interval. Dashed line = CLR phase angle (secondary axis).
