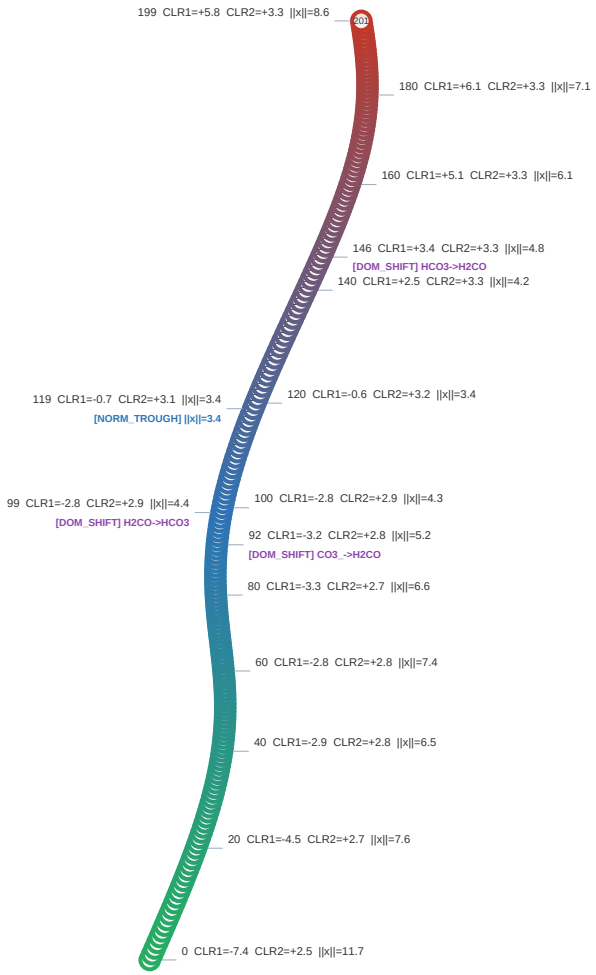
MANIFOLD HELIX — POLAR SLICE MAP

CARBONIC_ACID_TITRAT | Carbonic Acid Titration | 200 intervals | 3 carriers



Each numbered circle marks a polar slice. Coordinates: CLR1 (x), CLR2 (y), interval (z).

Intervals: 200 | Carriers: H2CO3, HCO3_minus, CO3_2minus | Events detected: 4

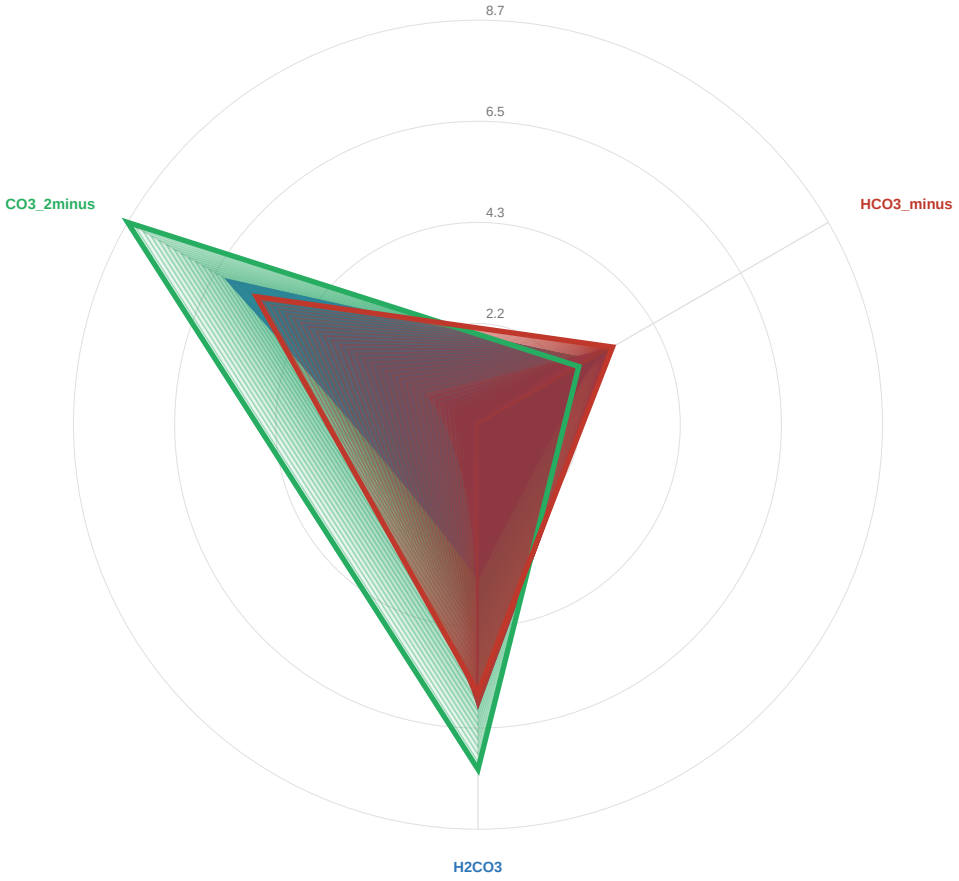
GHOST STACK — ALL INTERVALS OVERLAID

CARBONIC_ACID_TITRAT | Carbonic Acid Titration | 200 slices composited



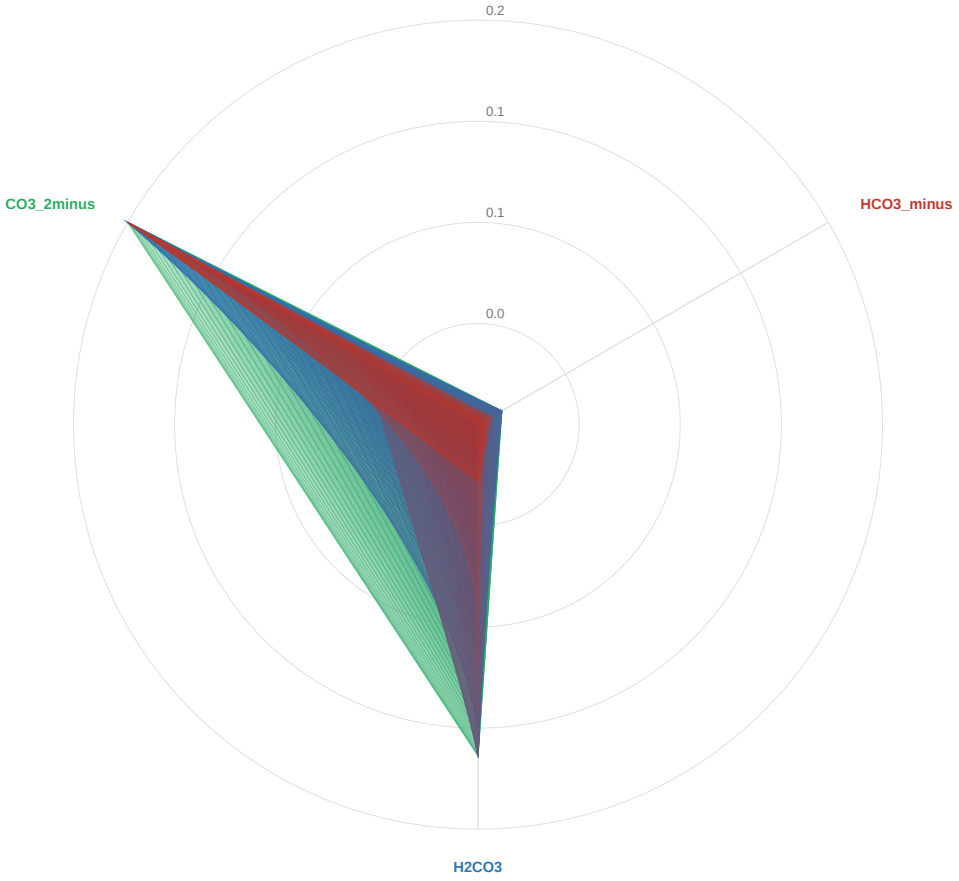
All 200 polar slices overlaid. Bold outlines: first (0, green) and last (199, red).

Density reveals where the manifold concentrates. Shape migration shows structural change over time.

Peter Higgins / Rogue Wave Audio / CC BY 4.0

DIFFERENCE POLAR — YEAR-OVER-YEAR CLR CHANGE

CARBONIC_ACID_TITRAT | Carbonic Acid Titration | 199 delta intervals



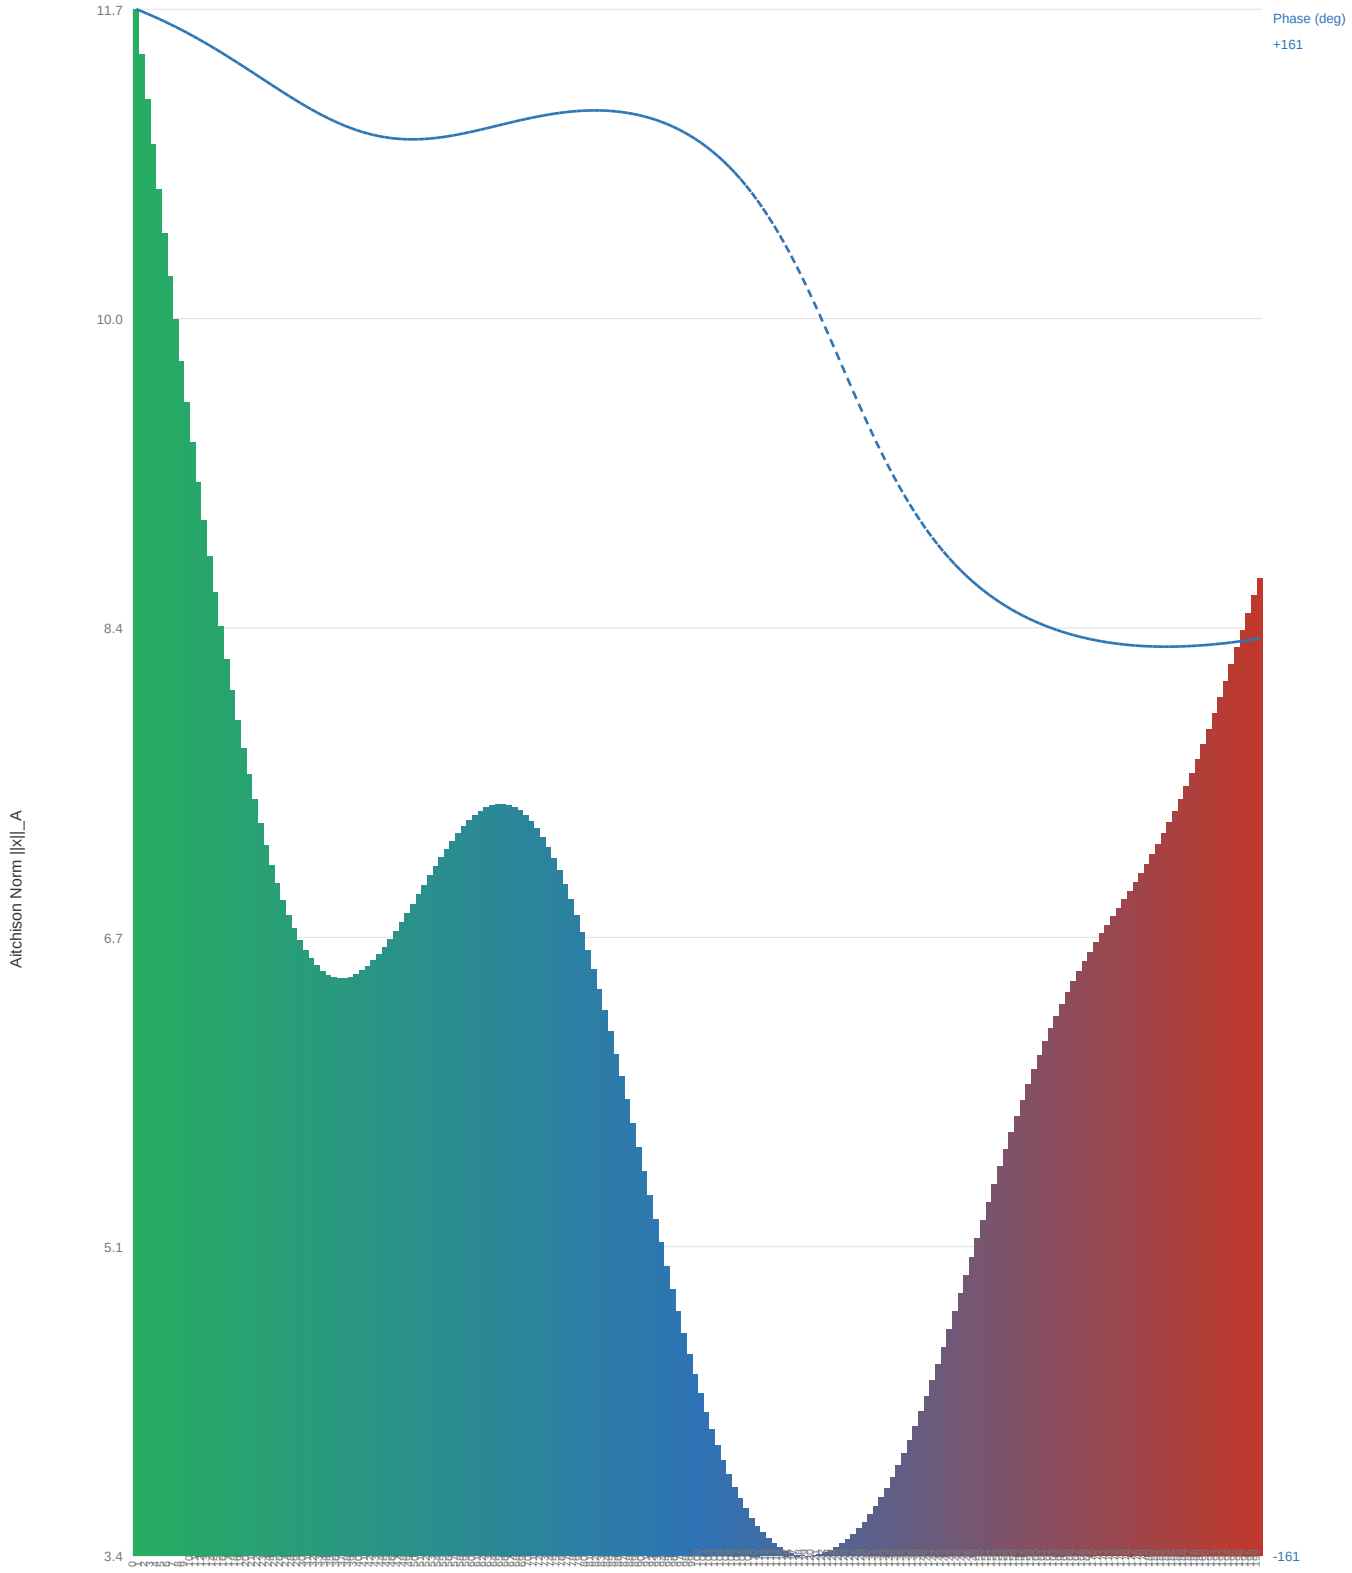
Year-over-year CLR differences (delta_CLR_j = CLR_j(t) - CLR_j(t-1)). Large polygons = rapid change. Small = stability.

Max delta: 0.19 | Mean delta: 0.13

Peter Higgins / Rogue Wave Audio / CC BY 4.0

AITCHISON NORM PROFILE

CARBONIC_ACID_TITRAT | Carbonic Acid Titration | 200 intervals



Min ||x|| = 3.40 | Max ||x|| = 11.67 | Mean = 6.29 | Range = 8.27

Bars = Aitchison norm per interval. Dashed line = CLR phase angle (secondary axis).
