

System Course Plots — CLR trajectory of each country's energy mix, 2000-2025

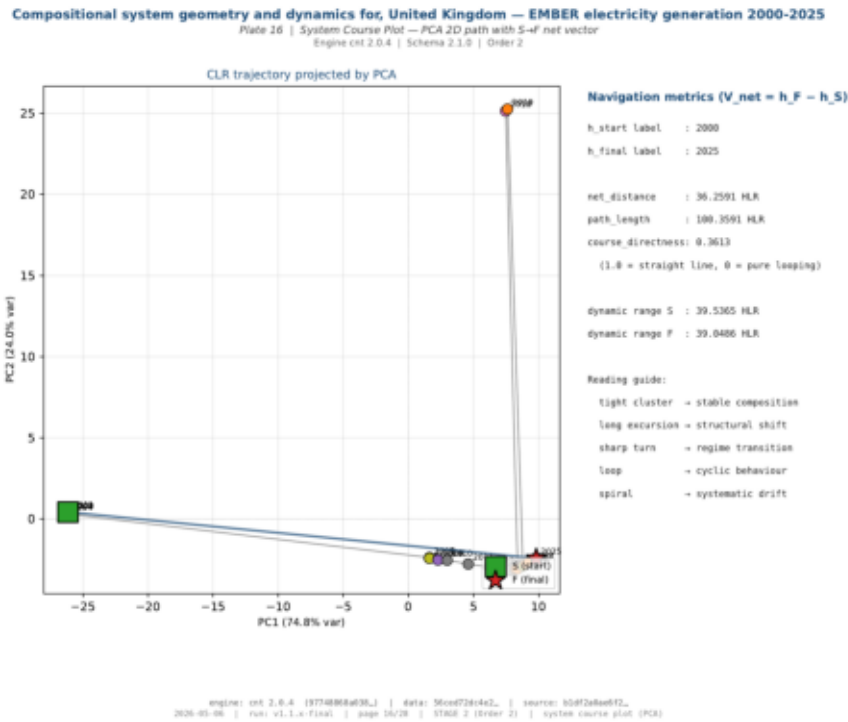

A. Germany · Continuous arc (course directness 0.41)

B. Japan · External shock — Fukushima 2011 (course directness 0.09)

C. United Kingdom · Regime change — coal exit (course directness 0.36)

Each labelled point is one annual composition; the line between successive points is the structural drift on the simplex. Navigation metrics readout on the right of each panel.
